Mekong River Commission

**Procedures for
Notification, Prior Consultation and Agreement**

PREAMBLE

Reaffirming the political will to continue to cooperate and promote in a constructive and mutually beneficial manner in the utilization and development of the Mekong River Basin water and related resources as recognized in the Agreement on the Cooperation for the Sustainable Development of the Mekong River Basin, signed at Chiang Rai, Thailand on 5 April 1995, hereinafter referred to as “the Mekong Agreement”;

Pursuant to the Mekong River Commission (MRC) Council’s Resolution on the Water Utilization Programme of 18th October 1999, and the decision of the MRC Joint Committee (JC) in February 2003 on the Establishment of the Technical Drafting Group 4 for the Procedures for Notification, Prior Consultation and Agreement, hereinafter referred to as “the Procedures”;

Recognizing the adaptive approach to the development of water utilization rules and the nature of the Procedures which are an integral part of the Rules for Water Utilization and Inter-Basin Diversions;

Reconfirming the commitment to work together to address the protection of the environment and the ecological balance in the Mekong Basin including the prevention of harmful effects and taking actions in emergency situations as covered by other Rules/Procedures approved by the MRC Council;

We hereby approve the following Procedures for Notification, Prior Consultation and Agreement:

1. Definitions of Key Terms

Wet and Dry Seasons: The dates of the start and end of the wet and dry seasons vary throughout the basin due to regional variations. According to the preliminary analyses of the relatively long time series of hydro-meteorological data, the wet season may start during mid-May to mid-June and end from mid-November to mid-December. The MRC JC will decide on the actual dates of the start and the end of the wet and dry seasons, based on analyses by the MRC Secretariat together with the National Mekong Committees (NMCs) of long term mainstream flow data.

Mainstream of the Mekong River: The river flowing through six countries, namely China, Myanmar, Lao PDR, Thailand, Cambodia and Viet Nam to the sea via My Thuan and My Tho in Viet Nam.

Mekong Tributary: A natural stream of the Mekong River System. For the purposes of the present Procedures, a tributary as decided by the JC is a natural stream of the Mekong River

System whose flows have a significant impact on the mainstream. This definition is subject to be reviewed and agreed upon after some time of implementation if any concern is raised.

Water Use/Utilization: For the purpose of the present Procedures, it means any use of water which may have a significant impact to the water quality or flows regime of the mainstream of the Mekong River System by any member State. The Joint Committee may review and revise this definition from time-to-time as required for effective implementation of the Procedures.

Inter-Basin Water Diversion: A diversion of water from the mainstream or a tributary of the Mekong River System into another basin.

Relevant and Key Definitions from the Mekong Agreement:

Agreement under Article 5: A decision of the Joint Committee resulting from prior consultation and evaluation on any proposed use for inter-basin diversions during the wet season from the mainstream as well as for intra-basin use or inter-basin diversions of these waters during the dry season. The objective of this agreement is to achieve an optimum use and prevention of waste of the waters through a dynamic and practical consensus in conformity with the Rules for Water Utilization and Inter-Basin Diversions set forth in Article 26.

Notification: Timely providing information by a riparian to the Joint Committee on its proposed use of water according to the format, content and procedures set forth in the Rules for Water Utilization and Inter-Basin Diversions under Article 26.

Prior consultation: Timely notification plus additional data and information to the Joint Committee as provided in the Rules for Water Utilization and Inter-Basin Diversion under Article 26, that would allow the other member riparians to discuss and evaluate the impact of the proposed use upon their uses of water and any other affects, which is the basis for arriving at an agreement. Prior consultation is neither a right to veto the use nor unilateral right to use water by any riparian without taking into account other riparians' rights.

Proposed use: Any proposal for a definite use of the waters of the Mekong River system by any riparian, excluding domestic and minor uses of water not having a significant impact on mainstream flows.

2. Objectives

- a. To provide steps for the MRC member States to support the establishment of the Rules for Water Utilization and Inter-Basin Diversions.
